ABOUT

Rawinnipa is a Bangkok-based software and consulting team with over twelve years of experience delivering production systems across fintech, Web3, enterprise AI, education, and manufacturing. We partner with clients to design, build, and operate software that holds up long after launch day — and we've collected a few international awards along the way for the work we do on blockchain and decentralized infrastructure.

WHAT WE DO

01 Blockchain & Web3

Layer 1/2 chains, smart contracts, DEX, oracles, bridges, NFT marketplaces.

02 AI & Automation

AI agents, LLM workflows, Computer Vision, n8n automation, enterprise AI integration.

03 Application Development

Web, mobile, LINE LIFF/Beacon, Telegram Mini Apps.

04 UX/UI & Systems Analysis

User-centered design, system architecture, requirements engineering.

05 Consulting & Training

Architecture planning, AI transformation workshops, technical enablement.

SELECTED WORK

Eight projects spanning blockchain, AI, enterprise systems, and hardware integration.

MaxiChain

BLOCKCHAIN

EVM Layer-1 network for Maxion's game platform — block explorer, bridge, DEX, faucet.

BKCOracle

BLOCKCHAIN

Oracle system on Bitkub Chain delivering price feeds and verifiable randomness on-chain.

GoodGeek

WEB PLATFORM

Thai crowdfunding platform connecting thinkers and builders with their supporters.

Zchoolmate

ENTERPRISE

Complete school management system — attendance, cafeteria POS, grading, enrollment, finance.

Carbon Audit

AI / ENTERPRISE

AI-powered carbon accounting — automated data entry and emissions calculation.

Mattress Defect AI

COMPUTER VISION

Custom-trained model detecting manufacturing defects, deployed to quality-control line.

Digital Twin Andaman

GOV / TOURISM

In-depth tourism analytics platform for the Andaman provinces with geospatial data.

Khaya

AI / LINE

LINE chatbot identifying waste types from photos using AI-powered image recognition.
